TACTICAL CENTERFIRE RIFLE

Speer LE® Gold Dot Duty Ammunition - Rifle

Speer LE® has earned the trust of today's law enforcement personnel with Gold Dot® Duty Ammunition. The nation's number one choice is known for unparalleled performance when it matters most. The joining of the jacket and core one molecule at a time eliminates the potential for the leading cause of bullet failure—jacket/core separation. Speer now brings this proven technology to the rifle platform. Gold Dot Duty Rifle bullets are optimized for expansion at a range of velocities out to 200 yards—even out of barrels as short as 10-inches. They also give outstanding feed and function in very short, short and standard AR platforms. The specially-designed loads feature flash suppressed propellants and a muzzle velocity up to 3000 fps.

Features & Benefits

- Flash suppressed propellants
- Proven Gold Dot® technology
- Reliable feeding in all AR platforms
- Impressive accuracy

DUTY PISTOL—NEW CALIBER

Speer® Gold Dot® Duty Ammunition - Pistol

The latest additions to the Speer® Gold Dot® Duty Ammunition include the brand new .327 Federal Magnum. Gold Dot ammunition is known for superb performance, accuracy and reliability. And thousands of law enforcement officers across the country and around the world trust their life with it. Created in conjunction with Ruger®, the .327 Federal Magnum brings the performance of a .357 Magnum with 20% less recoil to this outstanding line. Ideal for small, lightweight revolvers, it is a great personal defense load. Its manageable recoil and excellent ballistic performance ensure this new caliber is worth carrying. It provides twice the muzzle energy of a .38 Spl +P and will also fire .32 S&W and .32 H&R ammunition. Speer has also added two more .40 cal options to the Gold Dot Duty line.

Features & Benefits

- .327 Federal Mag is excellent caliber for small frame revolvers
- Get similar performance of .357 Magnum and 20% less recoil with .327 Federal Mag
- Superior terminal ballistics
- .327 Federal achieves twice the muzzle energy of .38 Spl +P
- Manageable recoil

TRAINING PISTOL

Lawman[®]

Training with ammunition that provides the feel and performance of duty ammunition gives officers the edge they need when it matters most. However, using duty ammunition on the range is not cost-effective. That's where Speer[®] Lawman[®] comes in. It delivers all the performance of duty ammunition for a fraction of the cost. Lawman uses high-value brass cases, CCI[®] primers and Speer TMJ[®] or conventional full metal jacketed bullets. The end result is tight groups, consistent pressure and velocity, every time you pull the trigger. Look for three new loads this year.

Features & Benefits

- Replicates duty ammunition
- Affordable training
- Uniform jacket for good accuracy

TRAINING PISTOL

Lawman[®] Clean-Fire[®]

For a shooter, the main exposures to the heavy metals lead, barium and antimony are at the firing point. The most significant is the lead residue emitted from the primer. Lawman[®] Clean-Fire[®] ammunition virtually eliminates lead at the firing point by combining a TMJ bullet with a priming mixture that contains no lead, barium or antimony. This ammunition also delivers the same level of performance, function and accuracy as standard ammunition.

Features & Benefits

- Reduces airborne lead
- Same level of performance as standard ammunition
- TMJ[®] bullet
- Lead-free primer

TRAINING PISTOL

Lawman® RHT® Pistol

For clean, close-up training, you need a lead-free bullet that crumbles into very small pieces when it hits a metal backstop. The Lawman® RHT® ammunition features a precision-formed bullet made of sintered copper. This means there's no separate jacket that can produce sharp fragments on impact with a steel backstop. The tip of each RHT bullet is distinctively marked with Speer's patented pie-nose designation so range officers can tell it from conventional ammunition. All Lawman RHT loads also feature CCI's Clean-Fire primer for cleaner shooting.

Features & Benefits

- Bullets break up on impact with hard surfaces
- Ideal for metal targets
- Easy to identify
- Lead-free
